Don't compromise on quality...

Our composite doors have been designed to be both beautiful and practical. We have a variety of distinctive door ranges and decorative glass ranges. Both are available in a wealth of colours so you can design a door that makes a perfectly personal statement about you and your home.

Unparalleled Security

Thanks to its rigid polymer subframe, high density CFC-free polyurethane foam core, high impact resistant GRP skin and high quality multi-point locks.

Exceptional Durability

High impact resistant glass reinforced polyester (GRP) skin will maintain its pristine appearance in the face of everyday knocks and scratches and beyond.

Low Maintenance

Everything about our GRP composite doors are designed to be easy to maintain, including the triple glazed options insulated glass unit which encapsulates the delicate decorative glazing between two panes of clear glass, protecting it and making it easy to keep clean.

PAS23 & PAS24

This product has passed the independent PAS23 British Standard for weather resistance and the independent PAS24 British Standard for security as one component of a complete door set.

Stunning Aesthetics

Symmetry and balance are very much key elements as we want you to look at your door and feel it is perfect in every way. The woodgrain finish was developed from oak tree grain, creating a beautifully authentic appearance.

Superb Sound Insulation

Weighted noise reduction of 31 decibels. It means you can be sure your new door will keep outside noise to a minimum, helping to make your home the haven you want it to be.

Excellent Weatherproofing

Water resistant polymer composite rails that protect its core. This means it won't suffer from water absorption which can lead to skin de-lamination and cause functional problems that lesser products have. Your door will keep the weather at bay and stay looking good for longer.

Secured by Design

Official Police Security Initiative

Secured By Design

This product is accredited by Secured By Design and meets a Police preferred specification.

INTRODUCING NXT-GEN

*New and
exclusive*

**nxt-
gen**
next-generation

Our next-generation of composite doors...

The range features our latest innovation where the flush-fitted innerframe sits level with the moulding to give sleek lines and a finish which is unsurpassed.

Symmetry and balance are also very much key elements as we want you to look at your door and feel it is perfect in every way.

nxt-gen doors are simply stunning on their own, **sidelights are not available.**

ENERGY EFFICIENCY

Looking after our world and your wallet...

The rising cost of energy bills and the impact on the environment means we all want to keep our consumption to a minimum. One of the best ways to achieve this is to choose thermally efficient products which keep warmth in and cold out, saving money and emission levels.

Tests prove a Distinction GRP Composite Door is -

19%

More thermally efficient than a 48mm solid timber core composite door.

17%

More thermally efficient than a 44mm traditional timber panelled door.

FACT

Doors were tested at the University of Salford's Energy House. This represents a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25°C with an exterior temperature of 5°C.
