26 questions you should ask!

EYG OTHERS

EYG HIGH PERFORMANCE GLASS

The Low E-glass fitted by most home improvement companies has a U value of 1.8. EYG ECOSAVE Glass has a U value of 1.4 giving 22% more thermal performance than standard low-e glass.

Better thermal insulation - reducing heat loss further, saving you even more money on heating bills.

More comfortable rooms - better insulation means your home is cooler in the summer but warmer in the winter with fewer cold spots and drafts near windows or doors.

Less condensation - the inner surface of the glass stays warmer thereby reducing the likelihood of condensation.

Less tint in the glass - this gives clearer vision through your windows and means V your curtains or Georgian Bars don't look dirty or discoloured.

More light - less tint also means more light can enter your rooms, making a more comfortable environment and reducing the need for lighting.

Crystal clear - less of the "haze" (dusty effect) more common with traditional types of thermally insulating glass during manufacture.

Environmentally friendly - less need for heating helps to reduce energy consumption.

THE EYG WINDOW PROFILE

Our profile is quite simply the best looking you can buy, a fully shaped, highly engineered window system with:

5 chamber design for exceptional thermal performance. The design significantly reduces the cold bridging that occurs in older technology profile with only three chambers.

A fully matching profile system that means your windows doors and conservatory frames will all match in style and more importantly colour.

STRENGTH AND SECURITY

EYG Windows - feature mitre welded joints and stainless steel friction stays for extra strength.

28mm sealed double glazed units for superior noise reduction.

OGEE internal glazing beads not only look good but are more secure.

High security stainless steel shoot bolt lock with a night vent facility, locking handles fitted as standard.

V

EYG Doors - fitted with high security MILA Master high security multipoint lock featuring 2 hooks, 2 anti-lifts, 2 pre-compression roller cams which travel before the hooks to ensure smooth operation and positive door alignment
